

# Diamon-Fusion® Solar Panel Benefits

## BENEFIT (1)

### Cuts cleaning time/costs

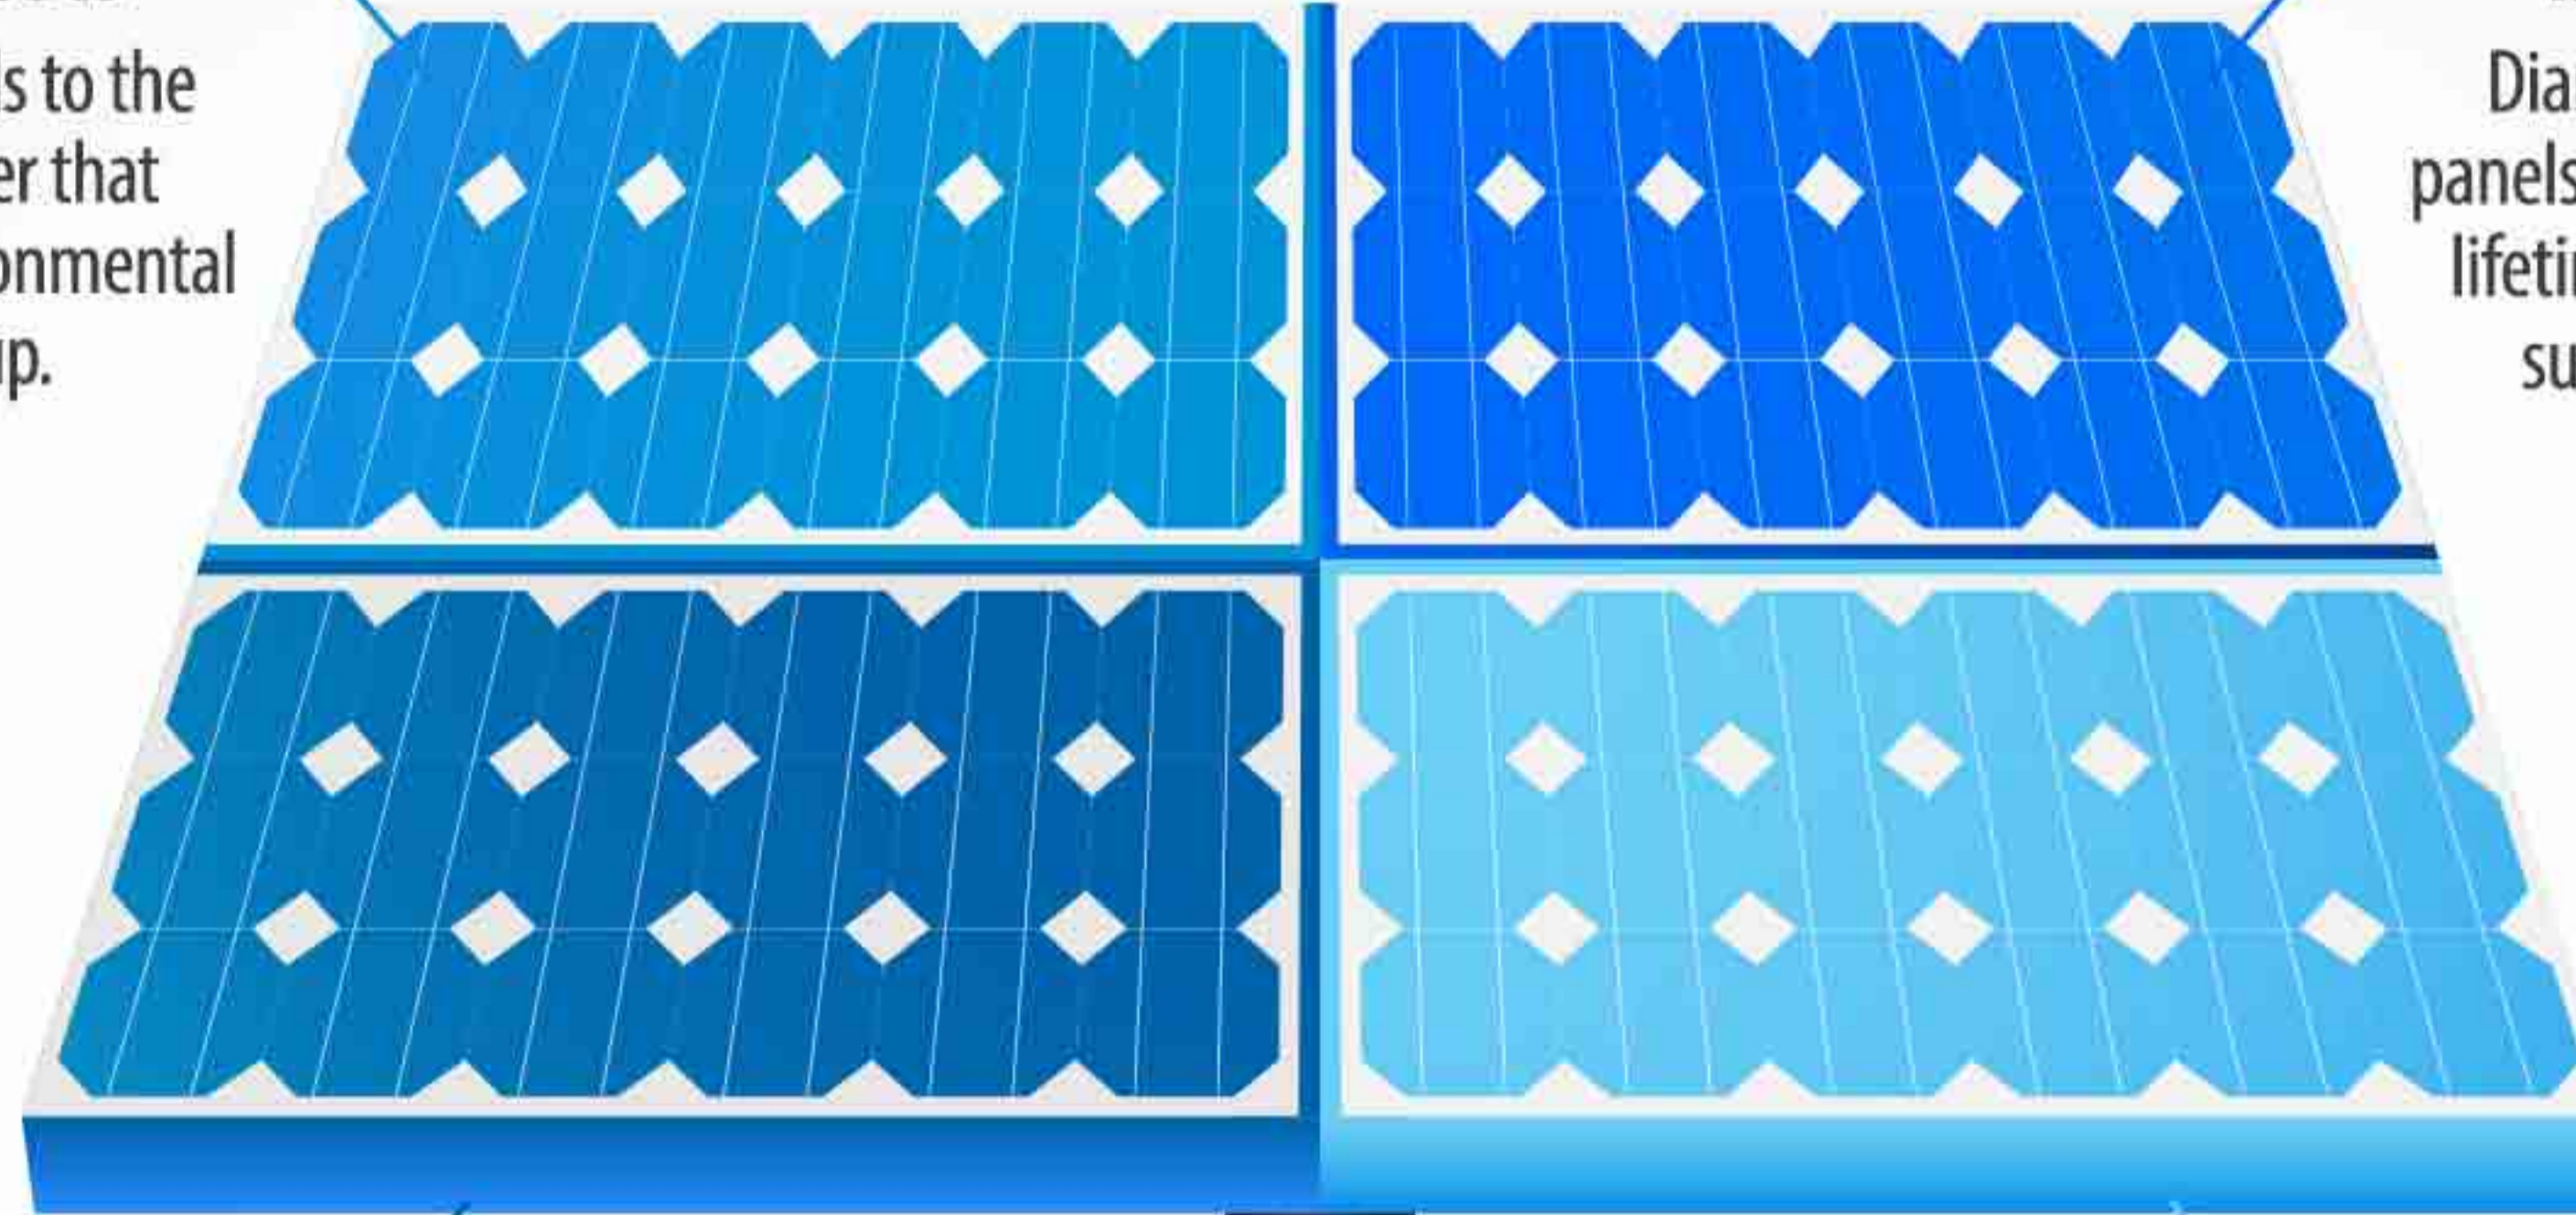

Diamon-Fusion chemically bonds to the glass creating an ultra-thin layer that repels rain, snow, sleet, and environmental pollutants for easier cleanup.

## BENEFIT (2)

### Increased Energy Efficiency

Diamon-Fusion maximizes your solar panels energy output, while improving the lifetime of the system by allowing more sunlight to pass through the glass.

## BENEFIT (3)

### Eco-Friendly/UV Resistant

Diamon-Fusion is 100% optically clear, UV resistant (won't breakdown in sunlight) and promotes a greener environment by eliminating the need for chemical cleaners.

## BENEFIT (4)

### Increased Durability

By creating an invisible, protective barrier over the glass, Diamon-Fusion adds impact resistance to solar panels that are exposed to hail, ice, debris, and much more.
